Professional Summary

A motivated and detail-oriented Software Engineer in training, specializing in Frontend/Backend Development and Enterprise Software Solutions. Experienced in building scalable web applications, management systems, and innovative digital platforms through both academic and personal projects. Skilled in Agile Development, Software Architecture, and user-focused solution design, with a strong ability to deliver optimized, reliable, and efficient systems.

Work Experience

Software Engineering Intern — Knoweb Solutions (Pvt) Ltd **Feb 2026 – Present**

Technologies Used: React.js, NestJS, JavaScript, Tailwind CSS, Spring Boot, REST APIs, MySQL, Git, GitHub Actions, CI/CD, DigitalOcean

- Contributed to the development of responsive web applications by working across both frontend and backend technologies, building modern user interfaces using React.js and Tailwind CSS.
- Developed scalable RESTful APIs and backend microservices with NestJS and Spring Boot frameworks while integrating structured MySQL databases for efficient data management.
- Implemented robust CI/CD pipelines using GitHub Actions to automate testing and modern continuous deployment workflows across cloud infrastructure.
- Deployed and maintained software applications on DigitalOcean cloud environments, collaborating closely with cross-functional teams to optimize performance and troubleshoot issues.

Projects

• **Anawuma – Digital Restaurant & Hotel Management Application**  Code — [Live](#)

Technologies Used: React.js, NestJS, MySQL, Socket.IO

Built an end-to-end hospitality management application featuring a contactless QR ordering system for customers and a real-time Kitchen Display System (KDS) for staff. Developed secure admin dashboards for billing, inventory, and sales report generation. Integrated real-time WebSocket communication and WhatsApp notifications.

• **Sanota – Industrial Engineering & Automation Platform**  Code — [Live](#)

Technologies Used: React.js, Spring Boot, MySQL, Vite, Framer Motion, Leaflet Map API

Designed and implemented a responsive full-stack platform featuring a React frontend and a Spring Boot backend. Leveraged MySQL for structured data storage, securing user authentication and client inquiries. Integrated dynamic project maps, interactive carousels, and smooth micro-animations.

• **VMS Super Mart – Supermarket Management System (Ongoing)**  Code — [Live](#)

Technologies Used: React.js, Vite, NestJS, TypeScript, MySQL, Socket.IO, Tailwind CSS

Developed a full-stack supermarket and logistics platform featuring a responsive customer storefront, a central admin panel for inventory, and a real-time mobile rider dashboard integrated with live notifications and navigation.

• **Knoweb Official Corporate Website**  Code — [Live](#)

Technologies Used: React.js, Next.js, JavaScript, Tailwind CSS, Git

Developed and optimized the official corporate website for Knoweb Solutions to enhance the company's digital presence. Built high-performance, SEO-friendly, and fully responsive landing pages using Next.js and React.js, ensuring seamless cross-device compatibility and modern fluid UI layouts.

Technical Skills

- Programming: Python, Java, JavaScript
- Frontend: React.js, HTML5, CSS3, TailwindCSS
- Backend: Spring Boot, NestJS, Node.js
- Databases: MongoDB, MySQL
- DevOps: GitHub Actions, CI/CD
- Cloud & Deployment: DigitalOcean, Vercel
- Tools & UI/UX: Git, GitHub, VS Code, Figma

Curricular Activities

- Deputy Director of Social Media, Zero Plastic NDT
- Member of ITUM Media Society
